# Exercise on File References

The diagram below represents a folder structure of a set of web files. The arrows indicate which items are contained within a particular folder. For example, the file `quiz.html` is contained inside the `project` folder.

Reference examples

Root-based reference to the `globe.jpg` file:

`/images/globe.jpg`   ←note slash at beginning of root-based reference

Relative reference to the `main.css` file if the current page is `quiz.html`:

`../main.css`

Relative reference to the `globe.jpg` file if the current page is `home.html`:

`images/globe.jpg`

Reference questions

1. What is the root-based reference to the **home.html** file?

2. What is the root-based reference to the **author.jpg** file?

3. What is the root-based reference to the **banner.jpg** file?

4. What is the relative reference to the **home.html** file if the current page is **bio.html**?

5. What is the relative reference to the **bio.html** file if the current page is **survey.html**?

6. What is the relative reference to the **decal.jpg** file if the current page is **home.html**?

7. What is the relative reference to the **author.jpg** file if the current page is **survey.html**?

8. What is the relative reference to the **logo.jpg** file if the current page is **quiz.html**?
